

SEASON E-TICKETS

Your ticket will be scanned on entry, and you will be hand stamped for in and out purposes at each home match.

Booking receipt

Upon booking your season ticket, you should receive an email with confirmation showing a list of your seats for every potential game of season; at that stage games will be dated August 1st (or similar) because we do not yet have fixtures for 25/26. That will act as a receipt and confirmation of your seats.

Ticket delivery:

Email - Once fixtures are in place, Spectrum will send an email with properly dated tickets which on game day can be presented on a mobile device or by printing at home. It is a regular A4 PDF file page that can be opened as any email attachment is opened. If you have more than one ticket, each ticket will show on the same document for each game. It will also include extra tickets that may eventually be Cup advanced rounds and playoffs.

Google/Apple Wallet- With the ticket delivery email above, you will now see 'Add to Apple Wallet' or 'Add to Google Wallet' if you wish to use that as a presentation alternative to opening the PDF or a printed version.

Account Login - Alternatively, you will also be able log into your season account by visiting guildfordflames.com and clicking on 'season ticket account' from home page or 'Season ticket login' on ticket page. That will allow you to see your ticket game list and access to download any game at any time. That access will use your season ticket booking email and a password (if you do not have a password you can do a forgotten password reset).

Alternative to e-ticket or print at home?

If electronic presentation or home printing are not feasible for you, a useful alternative may be to have them all printed and delivered to you from places like Doxdirect.com or printt.com which allow you to upload all of them at once to place an order for a very modest cost.

Additionally, Spectrum will allow people to verify identity at reception and collect a bar coded ticket on site prior to entry.
